

Pre Convention Tutorial Approaches to Sustainable Tribal Development On the 18th October 2019

RATIONALE FOR ORGANIZING THE TUTORIAL BY IBRAD

IBRAD's own field-tested concept, method and approaches

Realizing the multiple challenges of poverty, dwindling of the forest resources, depletion of groundwater, soil pollution and food insecurity of indigenous tribal farmers in the context of climate change, IBRAD has developed unique methods of sustainable tribal development by

- Unifying the social, biological and economic concepts
- Field-tested the concept and approaches
- Facilitating new social order and building appropriate social institutions
- Facilitating the process of transfer of appropriate technologies in different landscapes in India.
- Based on the learnings from across the country, IBRAD has developed approaches to 'Integrated Agro-Forest Mosaic Landscape Management for Sustainable Livelihood Development'

Acceptance of the methods and approaches by the academics, government and international bodies

Such approaches for introducing new social order and transfer of technology to address the issue of "Sustainable Livelihood" at one hand and "Conservation" on the other by involving the community themselves as partner of government functionaries have been appreciated and accepted by the Indian Council of Agriculture Research (ICAR), Government of India and the state governments of West Bengal, Jharkhand, and Chhattisgarh. The approach developed by IBRAD presented at FAO, Rome, is highly appreciated.

IBRAD is recognized as 'Centre of Excellence in Sustainable Tribal Development' by the Ministry of Tribal Affairs, Government of India

Application of the methods and approaches in the field and results

IBRAD has been implementing the approaches of "Integrated Agro-Forest Mosaic Landscape Management for Sustainable Livelihood Development" through the convergence of the different government functionaries like forest, agriculture, livestock, and water resource management. The approaches applied here has brought significant improvement in the livelihood of the small holder tribals, women empowerment in particular and will gradually be favouring reaching the SDGs.

OBJECTIVES

1. To create a forum for an interdisciplinary team of academic and implementing government functionaries where students of any discipline of social sciences can interact and plan for study "Tribal Development" beyond what he/she has learned in the classroom.
2. To create an opportunity for the students for practical fieldwork and hands-on training for the application of the knowledge through testing of Anthropological Approaches.
3. To create the opportunity to publish case studies, based on the synthesis of concepts from many different disciplines after application of the skills for Sustainable Tribal Development.
4. Opportunity to improve critical thinking & communication skills, to be able to analyze the problems of development and to find practical solutions through participatory methods, tools and approaches.
