Abstract

The humans use biological resources for their survival andwell - being. While human need biological resources for survival their actions are guided and regulated by both social and government institutions. Though there is no dearth of knowledge, policies, acts, rules, financial support for conservation of biodiversity but the results are not encouraging. Social institutionsare established sets of norms and sanctioned procedures. It can be designed to facilitate biodiversity conservation in view of societal need. Same way the government institutions are also established to meet the need and overall development of the society. The government institutions if work with social institution to conserve biodiversity will have desired result in the form of Bilateral Matching Institutions (BMI). The Government functionaries and the community can be sensitized for the common goal of conservation. The paper states how the challenges of biodiversity conservation can be addressed by designing effective community based social institutions and integrate them with the government institution through BMI that can lead to biodiversity conservation and contribute towards human well - being.

LESSONS FROM THE FIELD

Nick Salafsky

. many of the Biodiversity Conservation Network (BCN) funded projects have been successful in getting . enterprises to work, organizing community members,/ establishing monitoring regimes, and generally doing the work of conservation. Others have not. This type of work is not easy If BCN can claim one unqualified success, however, it is the learning and growth that has been sparked in all of us ... [\[Show full abstract\]](#)

The Direct Economic Impact of Brookdale Community College

January 1983

Gordon Jeremiah Ryan

Economic impact studies are of substantial value to administrators and faculty at community colleges because they provide tangible and reliable information on the measurable economic returns to be expected from the dollars invested in community colleges, and, therefore, can assist an institution to improve its position with its funding sources. An economic impact study was conducted by Brookdale ... [\[Show full abstract\]](#)

Valuing Biodiversity Enhancement in New Zealand

July 2008

Richard Tolentino Yao · Pamela Kaval

The value of biodiversity enhancement in New Zealand was estimated from a survey sample of 457 residents. We determined the willingness of respondents to financially support biodiversity programs on private and public lands, as well as determining which factors influence this willingness-to-pay. Our data indicates that an average respondent was willing-to-pay \$42 (2007 NZD) annually in their ... [\[Show full abstract\]](#)

Designing an English Public Services Ombudsman

July 2014 · Journal of Social Welfare and Family Law

Richard Kirkham · Jane Martin

This article explores the question of how to integrate the ombudsman community in England, a proposal for which there is much support but less agreement on the way forward. It is argued that, in the long-term, successful reform will not occur unless three distinct perspectives on administrative justice are incorporated into the proposal to form a single public services ombudsman for England. This ... [\[Show full abstract\]](#)

The Relative Importance of Likeability and Endangerment for Payments to Conserve Species (Summary of...

January 2014

Clement Allan Tisdell

This chapter reports on and analyses experimental evidence on the stated willingness of individuals to allocate funds for the conservation of individual wildlife species as a function of their likeability and their endangerment. Particular attention is given to the comparative importance of the independent variables: likeability and level of endangerment. Consideration is given to how information ... Grand Rounds and a Visiting Professorship Program in a Department of Radiology: How We Do It

September 2012 · Academic Radiology

Srini Tridandapani · Mark Edward Mullins · Carolyn Meltzer

We discuss the benefits of maintaining an active, rigorous, and highly structured grand rounds (GR) program in an academic radiology department. These benefits include education for faculty (continuing medical education), fellows, and residents and a venue for building collaboration and camaraderie within the department and institution, while also allowing for building ties with the radiology ... Financing the Commitment to Increase the Number of Minority Engineers

March 1974 · IEEE Transactions on Education

Donald G. Dickason

Financial support for minority engineering education must be provided if a 10-fold increase in minority engineering graduates is to be achieved. This paper analyzes the financial requirements as well as the possible sources of financial support. Sources of financial support include the family, student, educational institution, government, foundations, and employers. The author recommends that ... [\[Show full abstract\]](#)

Security Analysis of Cloud Computing Solutions

May 2014

● Charles Miers · ● Marcos Simplicio · ● Tereza Cristina M. B. Carvalho · [...] · Bruno Medeiros de Barros

Cloud computing solutions are increasingly adopted by companies and government from several sectors of the economy. In this scenario, the choice of cloud solutions can occur either by hiring an external service (public or community cloud) or by creating an own cloud to provide services only for this institution (private cloud). Even though the cloud technology does bring some interesting benefits ... [\[Show full abstract\]](#)

Increasing the awareness of palm oil plantation replanting through farmers training

August 2018

● Almasdi Syahza · ● Djaimi Bakce · ● Brilliant Asmit

Palm oil plantation in the Province of Riau has reached the unproductive age and need replanting. Private and government-owned plantation has started the replanting, but plantation community owned. The slow replanting process in smallholders' palm oil plantation caused by poor knowledge of replanting. This community service objective was to increase the awareness of replanting of palm oil ... Role of Accounting Information Transparency in the Government Financial Reform

November 2016

● Asmaa Mahdi Al-Hashimi

Transparency is the most important feature of government entities that seek to serve the community with a sense of real responsibility and under real control over the actions of these entities and the money they spent within the foundations and principles of transparency. Certainly, government corruption and transparency are opposites, an institution where transparency is absent, it evidence of ... [\[Show full abstract\]](#)

Reconciling global mammal prioritization schemes into a strategy

September 2011 · Philosophical Transactions of The Royal Society B Biological Sciences

● Carlo Rondinini · ● Luigi Boitani · Ana S L Rodrigues · [...] · ● Kerrie Ann Wilson

The huge conservation interest that mammals attract and the large datasets that have been collected on them have propelled a diversity of global mammal prioritization schemes, but no comprehensive global mammal conservation strategy. We highlight some of the potential discrepancies between the schemes presented in this theme issue, including: conservation of species or areas, reactive and ... [\[Show full abstract\]](#)
